November 1997

## Installation of Base Unit Adapter Brackets

This document describes installation of Base Unit Adapter Brackets for use with the IC693 programmable controllers. **Figure 1:** This bracket (IC693ACC308) allows a 10-slot baseplate to be mounted in a 19I rail. **Figure 2:** This bracket (IC693ACC309) allows IC693 base units to be mounted using existing IC610 programmable controller base unit mounting holes.

As shown in the illustrations, each base unit installation requires only **one** of the applicable Adapter Brackets. Install the Adapter Bracket by inserting the tabs at the top and bottom of the Adapter Bracket into the mating slots at the top and bottom of the base unit.
